**Subject:** Riverside Ag Park - Work Group Notification  
**Attachments:** riversideagparkerosioncontrolplanjune2016.pdf

Hello Work Group members, DTSC wants to inform you that on Tuesday, June 21<sup>st</sup>, work crews will be at the site to conduct erosion control and sediment activities. These activities are Best Management Practices (BMPs) per the updated Storm Water Pollution Prevention Plan (SWPP). These activities will be done in the northwest corner of the property in the northwest corner of the property in the drainage areas. The locations for those BMPs are in areas that will not be disturbed as part of the upcoming soil remediation. Additional BMPs will be installed (in a phased approach) in the future once soil removal and confirmation sampling is conducted. These erosion control and sediment activities are required by the Regional Water Quality Control Board (RWQCB), and will take about three (3) days.

If you have any questions, please contact me directly.
